Immunology and Cell Biology (2001) **79**, 609–615

Subject index

A

α heavy chain
  tracking events during B-cell differentiation 472
acetylation
  transcription factor cross-talk 376
action plans
  asthma in South Australia 1987–97 191
activation
  CD43 coactivation of intestinal intraepithelial lymphocytes 303
adaptation
  immunity and behaviour in sheep 583
adherence
  IL-1β mRNA localization in adherent monocytes 444
adhesion molecules
  adhesion molecules on sheep eosinophils 240
  lymphotoxin-α regulates $\alpha_E\beta7$-integrin expression 323
adrenal glands
  hypothalamic–pituitary–adrenal axis regulation of inflammation 395
affinity
  antigen valency and antibody function 507
αGal
  binding of GS1 B4 to αGAL 121
airway inflammation
  role of exhaled nitric oxide in asthma 178
  role of TNF-α in asthma 132
airway remodelling
  epithelium-fibroblast interactions 160
airway-reactivity
  role of TNF-α in asthma 132
allergy
  roles of the mucosal complement system 1
alpha-beta T-cell antigen receptor
  cross-reactivity in T-cell recognition 91
alpha-melanocyte stimulating hormone
  regulatory T cells induced by alpha-melanocyte stimulating hormone 358
animal disease models
  model of chronic human asthma 141
  synovial xenografts in SCID mice 309
antibody
  antigen valency and antibody function 507
  immunogenicity of DNA fusion constructs 49
  new approaches in asthma treatment 154
antigen valency
  antigen valency and antibody function 507
antigen-presenting cell
  cutaneous APC involved in antitumour immunity 29
antigens
  immunogenicity of DNA fusion constructs 49
anti-oxidant
  zinc and the respiratory epithelium 170
AP-1
  transcription factor cross-talk 376
apoptosis
  cytotoxic T cells mediated cell death and $p34^{cdc2}$ kinase 264
  serum prolactin and apoptosis in men with HIV 285
approach–avoidance
  immunity and behaviour in sheep 583
asthma
  asthma in South Australia 1987–97 191
  disulfide-linked structural model of interleukin-13 332
  eosinophil-induced airways hyperactivity 165
  epithelium-fibroblast interactions 160
  mast cell products in asthma 149
  model of chronic human asthma 141
  new approaches in asthma treatment 154
  role of exhaled nitric oxide in asthma 178
  role of TNF-α in asthma 132
  transcription factor cross-talk 376
astrocytes
  central nervous system and the pathogenesis of cerebral malaria 101
autoimmunity
  expression of a nephritogenic Ig heavy chain 222
  synovial xenografts in SCID mice 309

B

B cells
  lymphoid structure and B cell subsets 54
  tracking events during B-cell differentiation 472
bacteriolysis
  roles of the mucosal complement system 1
behaviour
  immunity and behaviour in sheep 583
blood
  adhesion molecules on sheep eosinophils 240
  HIV and bead uptake by dendritic cells and monocytes 255
brain
  neuroendocrine properties of macrophage migration inhibitory factor 368
Burkholderia pseudomallei
  chemokine and colony stimulating factor mRNA expression 490

C

carbohydrate epitope
  binding of GS1 B4 to αGAL 121
casein
  dietary protein and coccidial infection in mice 23
CD122
  T-cell survival and the role of cytokines 199
CD20
  cloning of mouse *HTm*$_4$ 345
CD25 T cells
  regulatory T cells induced by alpha-melanocyte stimulating hormone 358
$CD4^+$ cells
  T-cell survival and the role of cytokines 199
CD4-MHC class II
  liposomes can detect receptor interactions 274
$CD8^+$
  hepatitis C virus immunity 515

T-cell survival and the role of cytokines 199
CD8⁺ T lymphocytes
modified vaccinia virus Ankara-expressing mycobacterial protein 569
CD8⁺ T-cell memory
population dynamics of antiviral CD8⁺ T-cell memory 74
cell adhesion
fractalkine as an adhesion molecule 298
cell cycle
serum prolactin and apoptosis in men with HIV 285
cell lines
isolation of an LPS-resistant mutant 462
cell movement
chemokine-driven reverse gear migration 340
cell population dynamics
population dynamics of antiviral CD8⁺ T-cell memory 74
cell surface receptors
liposomes can detect receptor interactions 274
cell trafficking
lymphotoxin-α regulates $\alpha_E\beta 7$-integrin expression 323
cell-mediated immune responses
DNA vaccines 537
central immune system
immunity and behaviour in sheep 583
cerebral malaria
central nervous system and the pathogenesis of cerebral malaria 101
chelator-lipid liposomes
liposomes can detect receptor interactions 274
chemokine
chemokine and colony stimulating factor mRNA expression 490
chemokine-driven reverse gear migration 340
eosinophil-induced airways hyperactivity 165
Chlamydia psittaci
immunization against *Chlamydia psittaci* 245
chronic hepatitis
hepatitis C virus immunity 515
chronic inflammation
model of chronic human asthma 141
cilia
healing following removal of nasal mucosa 145
cobra venom factor
complement and myoblast transfer therapy 231
coccidiosis
dietary protein and coccidial infection in mice 23
colony stimulating factors
chemokine and colony stimulating factor mRNA expression 490
complement
complement and myoblast transfer therapy 231
roles of the mucosal complement system 1
complement-mediated phagocytosis
macrophage complement-mediated phagocytosis 429
conjugate
immunogenicity of DNA fusion constructs 49
conjunctival neoplasms
PGE2-induced pathways in T cells 482
conserved sequence
immunogenicity of DNA fusion constructs 49
corticotropin releasing factor
neuroendocrine–immune circuitry 400
cortisol
immunity and behaviour in sheep 583
costimulatory molecules
immunophenotyping responses to proteins 207
cross-talk
glucocorticoid-cytokine cross-talk 385
CXCR4
chemokine-driven reverse gear migration 340
cyclic AMP responsive element-binding protein
PGE2-induced pathways in T cells 482
cyclic GMP
atrial natriuretic peptide inhibits nitric oxide production by elevating calcium 11
cytokine
central nervous system and the pathogenesis of cerebral malaria 101
disulfide-linked structural model of interleukin-13 332
effect of IL-2 on skin graft rejection 128
glucocorticoid-cytokine cross-talk 385
hypothalamic–pituitary–adrenal axis regulation of inflammation 395
neuroendocrine properties of macrophage migration inhibitory factor 368
neuroendocrine–immune interactions 350
new approaches in asthma treatment 154
cytotoxic T cells
cytotoxic T cells mediated cell death and $p34^{cdc2}$ kinase 264
cytotoxic T lymphocytes
hepatitis C virus immunity 515

D

dendritic cell
cutaneous APC involved in antitumour immunity 29
HIV and bead uptake by dendritic cells and monocytes 255
ultraviolet-induced migration of skin dendritic cells 41
depletion
complement and myoblast transfer therapy 231
dietary protein
dietary protein and coccidial infection in mice 23
disease
viral genomes, immune evasion and disease 62
DNA methylation
association of hypermutation and demethylation 18
DNA quantification
complement and myoblast transfer therapy 231
DNA vaccination
immunogenicity of DNA fusion constructs 49
trafficking of DNA vaccines 87

E

effector mechanism
immunity and *H. pylori*: A role for mucus? 67
endocytosis
HIV and bead uptake by dendritic cells and monocytes 255
endoscopic sinus surgery
healing following removal of nasal mucosa 145

endothelial cells
fractalkine as an adhesion molecule 298
endothelium
central nervous system and the pathogenesis of cerebral malaria 101
endotoxemia
neuroendocrine properties of macrophage migration inhibitory factor 368
eosinophils
adhesion molecules on sheep eosinophils 240
eosinophil-induced airways hyperactivity 165
epithelium
epithelium-fibroblast interactions 160
zinc and the respiratory epithelium 170
evolution
viral genomes, immune evasion and disease 62

F
Fc receptors
antigen valency and antibody function 507
FcεRiβ
cloning of mouse *HTm*$_4$ 345
fibroblast
epithelium-fibroblast interactions 160
fibrosis
epithelium-fibroblast interactions 160
Flaviviridae
hepatitis C virus immunity 515
fluorescent resonance energy transfer probe
real-time quantitative reverse transcriptase–polymerase chain reaction method 213
four-transmembrane
cloning of mouse *HTm*$_4$ 345
fractalkine
fractalkine as an adhesion molecule 298

G
gene targeting
lymphotoxin-α regulates $\alpha_E\beta$7-integrin expression 323
genome
viral genomes, immune evasion and disease 62
germinal centre
association of hypermutation and demethylation 18
glia
central nervous system and the pathogenesis of cerebral malaria 101
glucocorticoid
glucocorticoid-cytokine cross-talk 385
hypothalamic–pituitary–adrenal axis regulation of inflammation 395
neuroendocrine properties of macrophage migration inhibitory factor 368
transcription factor cross-talk 376
GM-CSF
induction of nitric oxide synthase expression by granulocyte–macrophage colony-stimulating factor 590
Griffonia simplicifolia lectin
binding of GS1 B4 to αGAL 121

H
haematopoietic
cloning of mouse *HTm*$_4$ 345
heat shock proteins
rHsp65 from *M. avium* 454
Helicobacter pylori
immunity and H.pylori: A role for mucus? 67
hepatitis C virus
hepatitis C virus immunity 515
histamine
mast cell products in asthma 149
histones
transcription factor cross-talk 376
HIV
DNA vaccines 537
HIV and bead uptake by dendritic cells and monocytes 255
macrophage complement-mediated phagocytosis 429
serum prolactin and apoptosis in men with HIV 285
homeostasis
cross-reactivity in T-cell recognition 91
homology modelling
disulfide-linked structural model of interleukin-13 332
HTm$_4$
cloning of mouse *HTm*$_4$ 345
human
HIV and bead uptake by dendritic cells and monocytes 255
human breast milk
roles of the mucosal complement system 1
human histocompatibility leucocyte antigens
resistance to type 1 diabetes 602
human macrophages
macrophage complement-mediated phagocytosis 429
hypothalamic–pituitary–adrenal axis
hypothalamic–pituitary–adrenal axis regulation of inflammation 395
neuroendocrine properties of macrophage migration inhibitory factor 368
hypothalamic–pituitary–adrenocortical axis
neuroendocrine–immune circuitry 400
hypothalamic–pituitary–gonadal axis
neuroendocrine–immune circuitry 400

I
IgE
mast cell products in asthma 149
immune evasion
viral genomes, immune evasion and disease 62
immune regulation
CD43 coactivation of intestinal intraepithelial lymphocytes 303
immune response
central nervous system and the pathogenesis of cerebral malaria 101
dietary protein and coccidial infection in mice 23
neuroendocrine–immune interactions 350
immunisation
immunity and *H.pylori*: A role for mucus? 67
immunity
hepatitis C virus immunity 515

immunoglobulin heavy chain variable region
expression of a nephritogenic Ig heavy chain 222
immunoglobulin mutation
association of hypermutation and demethylation 18
immunoglobulin transgene
expression of a nephritogenic Ig heavy chain 222
immunoglobulin
H2 locus affecting IgG2a levels 576
tracking events during B-cell differentiation 472
immunomodulatory hormone
atrial natriuretic peptide inhibits nitric oxide production by elevating calcium 11
immunophenotyping
immunophenotyping responses to proteins 207
immunosuppression
ultraviolet light induced injury 547
ultraviolet-induced migration of skin dendritic cells 41
in situ hybridization
IL-1β mRNA localization in adherent monocytes 444
in vivo
population dynamics of antiviral $CD8^+$ T-cell memory 74
serum prolactin and apoptosis in men with HIV 285
inducible nitric oxide synthase
atrial natriuretic peptide inhibits nitric oxide production by elevating calcium 11
infection
roles of the mucosal complement system 1
infectious immunity
population dynamics of antiviral $CD8^+$ T-cell memory 74
inflammation
macrophage–neutrophil interaction 502
synovial xenografts in SCID mice 309
T-cell surface expression of 300 kDa mannose-6-phoshate receptor 436
transcription factor cross-talk 376
ultraviolet light induced injury 547
zinc and the respiratory epithelium 170
inhibitor of kappa B-like gene
resistance to type 1 diabetes 602
insulin
neuroendocrine properties of macrophage migration inhibitory factor 368
integrin
fractalkine as an adhesion molecule 298
interleukin
disulfide-linked structural model of interleukin-13 332
effect of IL-2 on skin graft rejection 128
eosinophil-induced airways hyperactivity 165
interleukin-1β mRNA localization in adherent monocytes 444
mast cell products in asthma 149
new approaches in asthma treatment 154
T-cell survival and the role of cytokines 199
intra-epithelial lymphocytes
lymphotoxin-α regulates $\alpha_E\beta7$-integrin expression 323

L

Langerhans cell
cutaneous APC involved in antitumour immunity 29
Leishmania mexicana
susceptibility to *L. mexicana* infection 320
leucocyte recruitment
synovial xenografts in SCID mice 309
lipopolysaccharide
isolation of an LPS-resistant mutant 462
liver
hepatitis C virus immunity 515
mast cells the rat liver 35
low-affinity interactions
liposomes can detect receptor interactions 274
luciferase
trafficking of DNA vaccines 87
luteinizing hormone-releasing hormone
neuroendocrine–immune circuitry 400
lymph
trafficking of DNA vaccines 87
lymphocyte
chemokine-driven reverse gear migration 340
immunity and behaviour in sheep 583
T-cell surface expression of 300 kDa mannose-6-phoshate receptor 436
lymphotoxin-α
lymphoid structure and B cell subsets 54

M

macrophage migration inhibitory factor
neuroendocrine properties of macrophage migration inhibitory factor 368
macrophage
atrial natriuretic peptide inhibits nitric oxide production by elevating calcium 11
isolation of an LPS-resistant mutant 462
macrophage–neutrophil interaction 502
metallothionein in oxidative burst 251
major histocompatibility complex
diabetes develops without B lymphocytes 597
resistance to type 1 diabetes 602
H2 locus affecting IgG2a levels 576
mammary gland
adhesion molecules on sheep eosinophils 240
management
asthma in South Australia 1987–97 191
mannose-6-phosphate receptor
T-cell surface expression of 300 kDa mannose-6-phoshate receptor 436
marginal zone
lymphoid structure and B cell subsets 54
mast cell
mast cells the rat liver 35
mast cell products in asthma 149
the role of TNF-α in asthma 132
maternal milk
transforming growth factor-β receptor III in rat milk 291
mathematical model
population dynamics of antiviral $CD8^+$ T-cell memory 74
melanocortin 5 receptor
regulatory T cells induced by alpha-melanocyte stimulating hormone 358
melioidosis
chemokine and colony stimulating factor mRNA expression 490

memory T cells
T-cell survival and the role of cytokines 199
men
serum prolactin and apoptosis in men with HIV 285
messenger RNA
IL-1β mRNA localization in adherent monocytes 444
metallothionein
metallothionein in oxidative burst 251
mice
H2 locus affecting IgG2a levels 576
microglia
central nervous system and the pathogenesis of cerebral malaria 101
migration
ultraviolet-induced migration of skin dendritic cells 41
modified vaccinia virus Ankara
modified vaccinia virus Ankara-expressing mycobacterial protein 569
monocyte
IL-1β mRNA localization in adherent monocytes 444
HIV and bead uptake by dendritic cells and monocytes 255
mouse
association of hypermutation and demethylation 18
mRNA
atrial natriuretic peptide inhibits nitric oxide production by elevating calcium 11
tracking events during B-cell differentiation 472
mucociliary clearance
healing following removal of nasal mucosa 145
mucosal immunity
roles of the mucosal complement system 1
mucus
immunity and *H.pylori*: A role for mucus? 67
Mus musculus
association of hypermutation and demethylation 18
mycobacteria
rHsp65 from *M. avium* 454
modified vaccinia virus Ankara-expressing mycobacterial protein 569
myeloperoxidase
macrophage–neutrophil interaction 502
myoblast transfer therapy
complement and myoblast transfer therapy 231

N

nasal mucosa
healing following removal of nasal mucosa 145
nephritogenic immunoglobulin
expression of a nephritogenic Ig heavy chain 222
neuroendocrine
neuroendocrine properties of macrophage migration inhibitory factor 368
neuroendocrine–immune interactions 350
neuro-immunomodulation
regulatory T cells induced by alpha-melanocyte stimulating hormone 358
neuron–glial interactions
neuroendocrine–immune circuitry 400
neutrophil
macrophage–neutrophil interaction 502
NF-κB
induction of nitric oxide synthase expression by granulocyte–macrophage colony-stimulating factor 590
transcription factor cross-talk 376
nitric oxide
induction of nitric oxide synthase expression by granulocyte–macrophage colony-stimulating factor 590
isolation of an LPS-resistant mutant 462
role of exhaled nitric oxide in asthma 178
nitrosothiols
role of exhaled nitric oxide in asthma 178
non-obese diabetic mice
diabetes develops without B lymphocytes 597

O

osteoarthritis
synovial xenografts in SCID mice 309
oxidative burst
metallothionein in oxidative burst 251

P

partial protection
immunization against *Chlamydia psittaci* 245
pathology
central nervous system and the pathogenesis of cerebral malaria 101
peptide immunization
immunization against *Chlamydia psittaci* 245
persistence
viral genomes, immune evasion and disease 62
perturbation–compensation
immunity and behaviour in sheep 583
phenotype
mast cells the rat liver 35
phosphatases
cytotoxic T cells mediated cell death and $p34^{cdc2}$ kinase 264
prevalence
asthma in South Australia 1987–97 191
prime–boost immunization
modified vaccinia virus Ankara-expressing mycobacterial protein 569
prostaglandin
PGE2-induced pathways in T cells 482
protein kinases
cytotoxic T cells mediated cell death and $p34^{cdc2}$ kinase 264

Q

quantitative polymerase chain reaction
real-time quantitative reverse transcriptase–polymerase chain reaction method 213
tracking events during B-cell differentiation 472

R

rat mast cell protease
mast cells the rat liver 35
receptors
transcription factor cross-talk 376

recombinant antigen
rHsp65 from *M. avium* 454
regulation
neuroendocrine–immune interactions 350
regulatory T cells
regulatory T cells induced by alpha-melanocyte stimulating hormone 358
remodelling
model of chronic human asthma 141
resistance
resistance to type 1 diabetes 602
respiratory
zinc and the respiratory epithelium 170
rheumatoid arthritis
human synovial cell antigen 419
hypothalamic–pituitary–adrenal axis regulation of inflammation 395
macrophage–neutrophil interaction 502

S
SCID mouse
synovial xenografts in SCID mice 309
secretory protein
immunophenotyping responses to proteins 207
self tolerance
cross-reactivity in T-cell recognition 91
serum prolactin
serum prolactin and apoptosis in men with HIV 285
severe combined immunodeficiency
diabetes develops without B lymphocytes 597
sheep
adhesion molecules on sheep eosinophils 240
healing following removal of nasal mucosa 145
trafficking of DNA vaccines 87
skin cancer
ultraviolet-induced migration of skin dendritic cells 41
skin dendritic cell
induction of nitric oxide synthase expression by granulocyte–macrophage colony-stimulating factor 590
skin
cutaneous APC involved in antitumour immunity 29
effect of IL-2 on skin graft rejection 128
ultraviolet light induced injury 547
soy
dietary protein and coccidial infection in mice 23
spleen
lymphoid structure and B cell subsets 54
STAT4
susceptibility to *L. mexicana* infection 320
STAT6
susceptibility to *L. mexicana* infection 320
steroids
glucocorticoid-cytokine cross-talk 385
stimulation
CD43 coactivation of intestinal intraepithelial lymphocytes 303
stress
immunity and behaviour in sheep 583
neuroendocrine–immune circuitry 400
stromal cell derived factor-1
chemokine-driven reverse gear migration 340
suckling intestine
transforming growth factor-β receptor III in rat milk 291
survival
complement and myoblast transfer therapy 231
SYBR Green I
real-time quantitative reverse transcriptase–polymerase chain reaction method 213
synovial cells
human synovial cell antigen 419
synovium
synovial xenografts in SCID mice 309

T
T cell
CD43 coactivation of intestinal intraepithelial lymphocytes 303
glucocorticoid-cytokine cross-talk 385
T-lymphocyte activation
T-cell surface expression of 300 kDa mannose-6-phoshate receptor 436
T lymphocytes
cross-reactivity in T-cell recognition 91
diabetes develops without B lymphocytes 597
PGE2-induced pathways in T cells 482
DNA vaccines 537
Taqman
real-time quantitative reverse transcriptase–polymerase chain reaction method 213
T-cell subsets
neuroendocrine–immune interactions 350
T-cell survival
T-cell survival and the role of cytokines 199
theoretical model
chemokine-driven reverse gear migration 340
THP-1 cells
fractalkine as an adhesion molecule 298
thymic emigration
lymphotoxin-α regulates $\alpha_E\beta7$-integrin expression 323
transcription factor
glucocorticoid-cytokine cross-talk 385
transcription factor cross-talk 376
transforming growth factor-β
transforming growth factor-β receptor III in rat milk 291
transgene
association of hypermutation and demethylation 18
transplantation
complement and myoblast transfer therapy 231
Trichostrongylus colubriformis
adhesion molecules on sheep eosinophils 240
tuberculosis
immunophenotyping responses to proteins 207
DNA vaccines 537
tumor necrosis factor
isolation of an LPS-resistant mutant 462
lymphoid structure and B cell subsets 54
macrophage–neutrophil interaction 502
mast cell products in asthma 149
role of TNF-α in asthma 132

type 1 diabetes
resistance to type 1 diabetes 602
U
ultraviolet
cutaneous APC involved in antitumour immunity 29
ultraviolet-induced migration of skin dendritic cells 41
ultraviolet light induced injury 547

V
vaccinia virus
modified vaccinia virus Ankara-expressing mycobacterial protein 569
vaginal secretion antibody
immunization against *Chlamydia psittaci* 245
vascular cell adhesion molecule-1
human synovial cell antigen 419
viral hepatitis
hepatitis C virus immunity 515
viral persistence
hepatitis C virus immunity 515
virus infection
population dynamics of antiviral $CD8^+$ T-cell memory 74
viral genomes, immune evasion and disease 62

W
whey
dietary protein and coccidial infection in mice 23
wound healing
healing following removal of nasal mucosa 145

X
xenograft
synovial xenografts in SCID mice 309
xenotransplantation
binding of GS1 B4 to αGAL 121

Z
zinc
zinc and the respiratory epithelium 170
